

The Preservation of Antiquities: A Handbook for Curators

Friedrich Rathgen (1862-1942) was a German chemist who made a profound contribution to the development of conservation science. First published in 1905, this book contains an English translation of Rathgens 1898 work *Die Konservierung von Altertumsfunden*, the first comprehensive text on the subject of archaeological conservation. The book is divided into two parts: part one is concerned with the changes undergone by antiquities in earth and air; part two discusses the treatment of antiquities, with examples of various methods used for conservation. Numerous illustrative figures and a bibliography are also provided. This book will be of value to anyone with an interest in conservation science and archaeology.
